Seamless Operation

We install high-quality cameras in your chapel to stream the service for you.

Our easy-to-use system takes just minutes to schedule a service.

No camera operator is needed during the service as the cameras automatically start and stop recording at the scheduled times.

[VIEW MORE FEATURES >](#)

We can focus on our job and OneRoom is just working in the background automatically. There is no real way to get user error. It's such a simple system with the cameras mounted on the walls and the audio built-in."

— Krause Funeral Home

Reliable & Supported

We take every measure to make sure your stream will be a success

We prioritize your peace of mind

System checks are run before, during, and after the service.

Back-up recording on the device, guaranteeing a captured recording even if internet connectivity is lost.

Full support for you and your guests

Our streaming experts are available via phone to assist you anytime.

We handle all inquiries from online guests, so you won't be interrupted during the service.

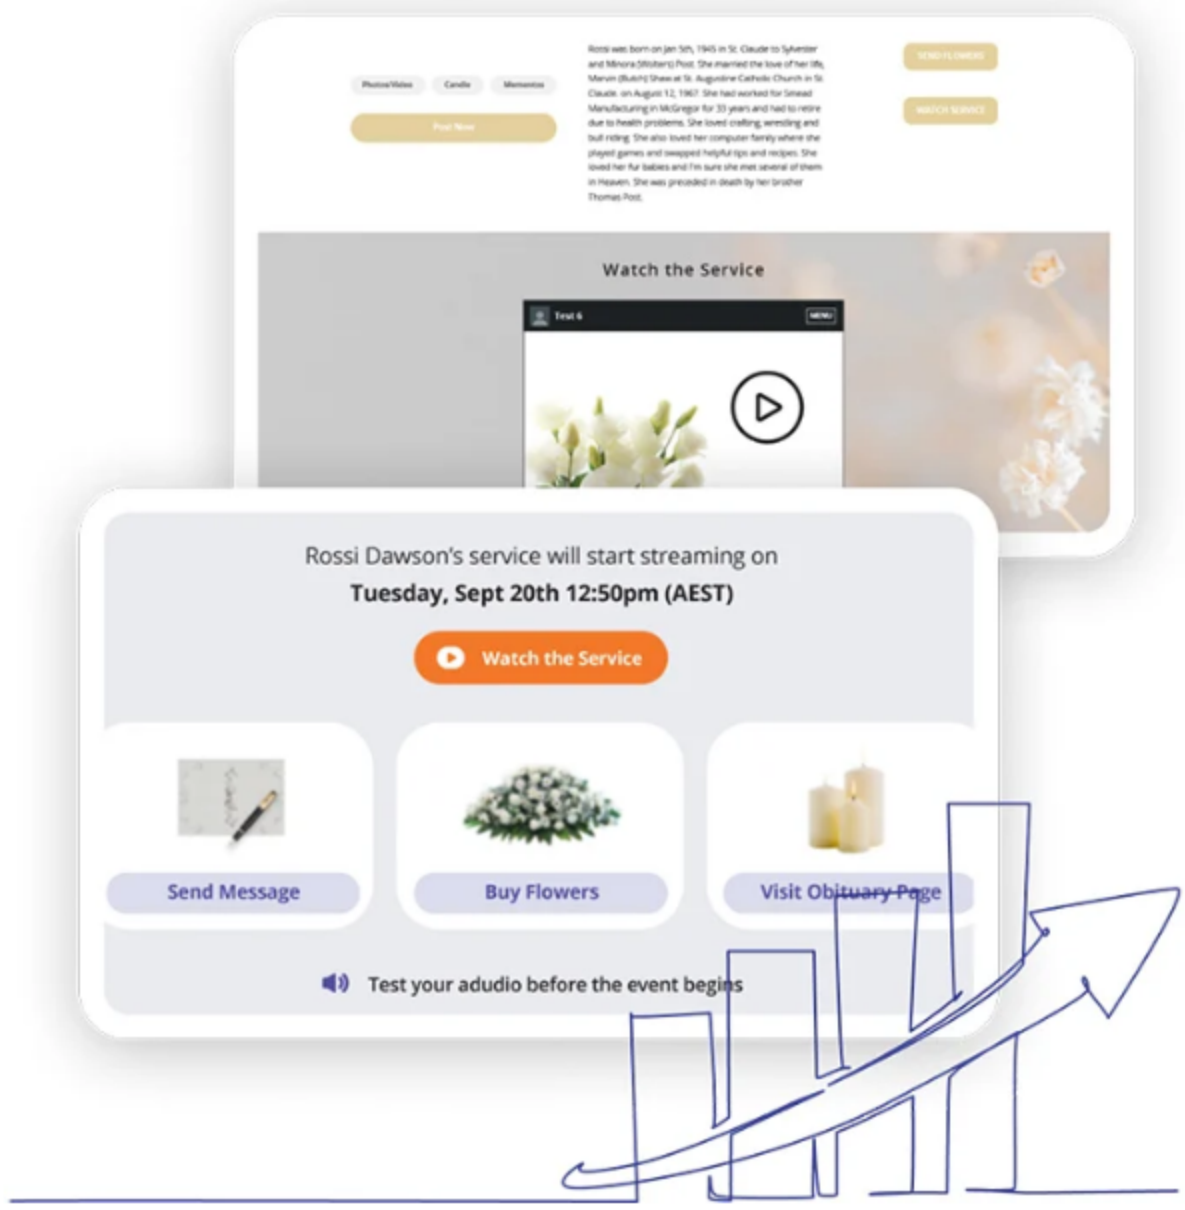

"I really value the relationship we've built with OneRoom. They're more than just a live streaming company. They're looking out for your best interest as a whole and they're willing to help in any way possible."

— Holley Sowards, Einans at Sunset Funeral Home

Promote your Services

Streaming connects you to more people in your community

Bring more visitors to your website

Each funeral receives an average of 40 online guests. By channeling these guests through your website, they can leave condolence messages, send flowers, or purchase memorial items to show support for close family.

Increase your funeral sales

Providing the same level of care and service to online guests as those in your chapel builds familiarity and trust. This meaningful online experience results in future pre-need or at-need customers.

From a purely business point of view it allows us to have far greater contact with a wider group than just the immediate family, and the fact that it's a first class product is also beneficial to our professional image."
